# Cybersecurity Collaborative and Cybereason Launch CISO Stories Podcast

**Co-hosts Todd Fitzgerald and Sam Curry Welcome Top Security Leaders  
In New Podcast Produced by Security Weekly**

**New York, NY, March 10, 2021** – [Cybersecurity Collaborative](#), a CyberRisk Alliance (CRA) membership community for senior cybersecurity leaders to work together on complex enterprise security challenges, in partnership with endpoint security platform Cybereason, today announced the launch of CISO Stories, a weekly podcast series. Produced by CRA's podcast platform Security Weekly, CISO Stories takes a deep dive into critical security topics with top leaders, representing a wide array of industries, who share their insights and expertise with the broader security community.

CISO Stories is co-hosted by Todd Fitzgerald, VP of Cybersecurity Strategy at Cybersecurity Collaborative, and Sam Curry, Chief Security Officer at Cybereason, and is published Security Weekly's podcast network serving more than 30,000 subscribers with nearly 3 million downloads in 2020. Each week the hosts will unpack the extraordinary perspectives and exceptional experiences of CISOs and other front-line cybersecurity leaders.

Guests on the show include well known security leaders, such as Dawn Capelli, CISO at Rockwell Automation; Ari Schwartz, of the Cybersecurity Coalition; Tony Sager, Former COO for Information Assurance at the NSA and SVP at The Center for Information Security; Roland Cloutier, Global CISO at TikTok; Steve Katz, Executive Advisor Deloitte, and more.

“CISO Stories is an excellent opportunity to highlight senior leaders in cybersecurity, hear their accounts of how they have addressed challenges they've faced and learn the specific and pragmatic actions they've taken to elevate not only their organizations but the community at large,” said co-host and author Todd Fitzgerald. “We're thankful to Cybereason and Security Weekly as they help us grow this weekly series and continue to put a spotlight on these trailblazing leaders.”

“We are enthusiastic about this new resource for security leaders, as our goal is to cut through the noise around cybersecurity and offer the audience an unvarnished take on the most important issues of the day from leaders who help shape the industry,” said co-host and innovator Sam Curry. “These

are candid conversations that drill down into a wide array of topics, with unvarnished opinions from some of the most influential names in security.”

All CISO Stories episodes can be found on [Security Weekly’s website](#), on the [Cybereason blog](#), or by subscribing through your favorite podcast platform.

### **About the Cybersecurity Collaborative**

Cybersecurity Collaborative (CSC) is a mission-based membership organization that helps cybersecurity leaders be more successful. We facilitate trusted peer-to-peer collaboration, networking, and CISO-led content development to strengthen our members.

### **About Security Weekly**

Security Weekly is the security podcast network for the security community, distributing free podcasts and media since 2005. Leveraging our experienced security practitioners, we connect the security industry with the security community. Our unique approach to podcasts helps educate the security community through our programs, known as security market validation.

### **About CyberRisk Alliance**

CyberRisk Alliance (CRA) is a business intelligence company serving the cybersecurity community. Our mission is to provide the knowledge and insight needed to navigate today’s complex security landscape, and to support and empower the industry’s leaders. Our trusted information leverages a unique network of journalists, analysts and influencers, policymakers and practitioners, and is delivered through events, research, media, and virtual learning. Our brands include SC Media, Security Weekly, InfoSec World, Cybersecurity Collaboration Forum, our research unit CRA Business Intelligence, and the peer-to-peer CISO membership network, Cybersecurity Collaborative. More information is available at [CyberRiskAlliance.com](#).

### **About Cybereason**

Cybereason is the champion for today’s cyber defenders providing future-ready attack protection that unifies security from the endpoint to the enterprise, to everywhere the battle moves. The Cybereason Defense Platform combines the industry’s top-rated detection and response (EDR and XDR), next-gen anti-virus (NGAV), and proactive threat hunting to deliver context-rich analysis of every element of a Malop (malicious operation). The result: defenders can end cyber-attacks from endpoints to everywhere. Cybereason is a privately held, international company headquartered in Boston with customers in more than 30 countries.
